Profile

Final-year Computer Science student with practical experience contributing to bespoke software systems and developing computer vision projects. Experienced in breaking down real-world problems into technical requirements, working independently and collaboratively, and learning unfamiliar systems quickly. Strong interest in software engineering, artificial intelligence and developing technology that solves practical problems. Comfortable working through ambiguous problems, testing and refining solutions, and communicating ideas clearly.

Relevant Work Experience

Collabit Software Ltd *– Systems & Software Assistant* *August 2023 – August 2026*

- Supported the development and implementation of bespoke software systems used by water treatment engineers.
- Worked with Collabit's bespoke software platform to help build and adapt systems around the operational requirements of engineering teams.
- Translated real-world engineering workflows and operational requirements into software system requirements.
- Developed an understanding of how software systems can be structured around different business processes and industry-specific requirements.
- Worked independently on assigned tasks while collaborating with colleagues to develop practical solutions and meet project requirements.
- Learned unfamiliar software and operational processes quickly, applying structured problem solving to new requirements.
- Contributed to systems designed to support the organisation and management of field-service activities.

Strike Bowling *– Duty Manager* *September 2024 – January 2025*

- Supervised staff during busy shifts, allocating tasks and supporting colleagues to maintain efficient day-to-day operations.
- Responded to operational and safety issues promptly, assessing situations and coordinating practical solutions with colleagues.
- Managed competing priorities while maintaining service and operational standards.

- Communicated clearly with colleagues and customers, including when resolving challenging situations.
- Took responsibility for ensuring operational tasks were completed to the required standard.

Education

University of Westminster *– BSc (Hons)* *Expected May 2027*

- **Computer Science** – Expected 2:1

George Mason University (USA) - *Semester Abroad* *Spring 2025*

- International academic exchange, developing independence, adaptability and experience working within a different academic and cultural environment.

Languages

English – Native

Portuguese – Native

Spanish – Intermediate (B2)

Technical Skills

- Programming: Python, Java, HTML, CSS, Kotlin, MATLAB
- Software Engineering: Software design, problem solving, debugging, testing and iterative development
- Artificial Intelligence: AI fundamentals, machine learning, neural networks, deep learning, computer vision, natural language processing, reinforcement learning
- Development Tools: Cursor, ChatGPT, GitHub
- Development Practices: Requirements analysis, system design, solution development and documentation
- Professional: Teamwork, communication, independent working, adaptability and attention to detail

Additional Interests

Amateur Boxing

Regular boxing training has developed discipline, resilience, consistency and the ability to remain focused and composed in demanding environments.
