Profile

Final-year Computer Science student with experience contributing to bespoke software systems and developing technical solutions to real-world problems. Strong foundation in software engineering and Applied AI, with experience working independently and collaboratively. Interested in software engineering, artificial intelligence and developing practical technology solutions.

Education

University of Westminster *– BSc (Hons)* *Expected May 2027*

- **Computer Science** – Expected 2:1

George Mason University (USA) – *Semester Abroad* *Spring 2025*

- International academic exchange, developing independence, adaptability and experience working within a different academic and cultural environment.

Technical Skills

- **Programming Languages:** Python, Java, HTML, CSS, Kotlin, MATLAB
- **Software Engineering:** Software & system design, debugging, testing, iterative development, requirements analysis, documentation
- **Artificial Intelligence:** AI fundamentals, machine learning, neural networks, deep learning
- **Tools & Platforms:** Cursor, ChatGPT, GitHub, VS Code, Android Studio, MySQL, MongoDB, Microsoft Office, Jupyter Notebook, Trello
- **Professional:** Teamwork, communication, independent working, adaptability, attention to detail

Work Experience

Collabit Software Ltd *– Systems & Software Assistant* *August 2023 – August 2026*

- Contributed to the development and implementation of **bespoke software systems** supporting water treatment engineers and field-service operations.
- Worked with a bespoke software platform to **build and adapt system functionality** around operational workflows and industry-specific requirements.
- Analysed **real-world business and engineering processes** and helped translate operational requirements into practical software solutions.
- Applied **structured problem-solving** to new and changing requirements, identifying appropriate approaches and supporting the delivery of functional system solutions.
- Worked independently on assigned development tasks while collaborating with colleagues to **coordinate requirements, resolve issues and deliver project objectives.**
- Rapidly learned unfamiliar software, processes and domain requirements, demonstrating **technical adaptability and systems thinking** when working across different operational scenarios.

Strike Bowling *– Duty Manager* *September 2024 – January 2025*

- **Diagnosed and troubleshot technical and operational issues** with on-site systems and equipment, identifying faults and implementing practical solutions to minimise disruption.
- Created and maintained **spreadsheets, operational documents and reports** to organise information, support day-to-day management and monitor business activities.
- Coordinated day-to-day operations during busy shifts, **prioritising tasks, allocating resources and managing competing requirements** to maintain efficient service delivery.
- **Supervised and supported team members**, delegating responsibilities and coordinating workloads to achieve operational objectives.
- Took ownership of operational issues from identification through to resolution, demonstrating **initiative, accountability and analytical problem-solving.**
